

1. Print onto cardstock.
 2. Cut into strips of 3 cards, 47mm wide.
 3. "Laminate" with a standard roll of packing tape, both sides.
(This is why the cards are only 47mm wide.)
Trim excess tape by gliding scissors along the edges of each strip.
 4. Cut individual cards & use corner rounder if desired.
 5. If cards are too "sticky", dust them with cornstarch by stacking the deck & dipping the edges.
After a few plays the stickiness & excess powder will disappear.
- Enjoy!
